## Professional Summary

Enthusiastic junior software developer with expertise across front-end and back-end development. Proven ability in delivering robust web applications, embedded software, and performance optimization. Strong collaboration skills with experience working in cross-functional teams to solve technical challenges and implement cutting-edge solutions.

## Core Skills

- **Problem Solving** - Skilled in diagnosing and resolving complex technical issues, optimizing code performance, and ensuring software stability.
- **Adaptability** - Quickly adapts to new programming languages and frameworks to meet evolving project requirements and client needs.
- **Collaboration** - Proven ability to collaborate with developers, designers, and product owners, ensuring seamless integration across the development lifecycle.
- **Client-Focused Delivery** - Experienced in translating client requirements into technical solutions, ensuring projects align with business objectives and user expectations.

## Experience

### ● Nov 2024 - Present

Hoptech Global | 330 Collins St, Melbourne VIC 3000,

#### Software Developer

- Developed the front-end of a Jewellery Design Generative AI application in collaboration with backend, data and machine learning engineers.
- Utilised ReactJS to develop a user interface which handles multiple file uploads to a Flask server. The files are then used as a data set for processing on the backend, which then returns the AI generated images to the UI.
- Utilised the Axios API to handle the asynchronous operations of UI.

### ● Jan 2024 - Apr 2024

Anchor Ventures Holding | 23-29 South St, Rydalmere, Sydney

#### Software Developer

- Liaised with Web designers, Product owners and Senior engineers to develop a web application for a NDIS Disability service provider client based on a pre-existing Figma design. I developed the multi-page application using ReactJS and its related 3rd party libraries.
- Updated complex web Applications for prominent Australian businesses. I was solely tasked with performing rigorous testing involving end user testing, responsiveness, Security and code optimisation in React JS, after which I was tasked with implementing appropriate changes where necessary.

## Education

### University of Technology Sydney 2019 - 2023

Bachelor of Engineering (Honours) Electrical, Diploma in Professional Engineering Practice

## Tech Stack

#### Front-end

- JavaScript
- ReactJS
- Redux
- TypeScript
- React native
- Vue

#### Back-end

- Java
- SpringBoot
- MySQL
- Python
- PHP
- C# & .NET
